

# Heavy-Duty Weatherproof Push Button

This heavy-duty stainless steel push button is designed for use with our Voice Notification Transmitters, but its versatile design makes it suitable for any application requiring a reliable and robust push button. Whether you need a dependable switch for industrial, commercial, or custom applications, this button delivers excellent durability and performance.

The push button features a momentary closure mechanism, activating only when pressed, ensuring precise and responsive operation. The high-quality stainless steel button is securely mounted within a sturdy aluminum frame, complete with a heavy-duty mounting plate for long-lasting performance in demanding environments.

Whether for new installations or as a replacement switch, this push button is built to withstand frequent use while maintaining a sleek, professional appearance. Its rugged design ensures consistent performance in a wide range of conditions.

## KEY FEATURES:

- ✓ **Durable Construction:** Built with a stainless steel button and an aluminum frame for exceptional strength and corrosion resistance.
- ✓ **Heavy-Duty Mounting Plate:** Ensures stability and secure installation, even in high-traffic or industrial settings.
- ✓ **Compact Dimensions:** Measuring 4 9/16" x 2 13/16", this button fits seamlessly into various setups.
- ✓ **Complete Installation Kit:** Comes with a gasket and screws for hassle-free installation.
- ✓ **Versatile Applications:** Perfect for industrial control systems, intercom setups, and any project requiring a tough, momentary-action push button.
- ✓ **Electrical Box Mounting:** Can be mounted to a standard single-gang electrical box. Use a U.L. listed single-gang wet locations box for outdoors.
