

Wireless Radio Callboxes put communication exactly where you need it.

These wireless callboxes provide crisp, clear, long range voice communication with your existing two-way radio network. They are used in a variety of industries as a way for customers, employees, or visitors to communicate with your onsite personnel, central office, or security staff.

Place a compact and durable 2-way radio callbox virtually anywhere to maximize manpower efficiency, improve safety, and decrease response times.

Deploys easily - no wires, no trenching, no construction required. Battery powered for stand-alone operation, or use external AC power adapter for always-on operation.

Accomplish more with your UHF, VHF, or digital 2-way radio system!
